
Updating Rainlendar

Posted by Tan - 2013/12/05 15:14

There is a new ver of Rainlendar out 2.11.1 the check for update button does not go anywhere. It says new ver found do you want to go to website now? I click yes and nothing happens.

How do I actually update Rainlendar to the new ver? What is updated in the new ver?

Thanks

The button opens the default web browser on the Rainlendar's download page. Note that depending what browser you use it might open to another tab in you current browser.
