
Event (1) or (2)

Posted by Tan - 2013/12/08 22:24

I have events in Rainlendar that now have a number eg: (1) or (2) after them. What does this mean and how do I fix it?
Thanx

I guess those events are birthday or anniversary, right? At default, Rainlendar will add the (year) count number if the event's category is birthday or anniversary.
To fix it, you can a) Change event's category. b) Disable Options->General->"Add years after summary for categories".
