
Todo list

Posted by gregaz - 2013/12/14 13:32

Hi New rainlendar user, am using Shadow4wplus as my skin. I would like to be able to remove the name of my Google List from being displayed on my desktop ToDo list. I want to keep displaying my Google list items but with out the name of the list.

I hope this is possible.

Mike

Welcome to the forum, gregaz.

You mean : Google task list name was added to items ?

You can disable Options->Advanced-> "Show task calendar" setting.
