
Sync

Posted by ronnewsam - 2014/01/05 05:59

Hello,

Just purchased a Nokia Lumia 520 phone with Windows operating system.
Problem-I can't get the phone to sync with my Rainlender calender on my pc desktop.
Any help would be much appreciated. Thanks.

I'm not familiar with Windows phones but usually there is a way to sync your phone with Google Calendar so try you can use it to store the events and then sync both your phone and Rainlendar with it.
