

# Ggoogle calendar event added then deleted

Posted by AndyS01 - 2014/01/10 09:19

When I try to add an event to a google calendar, Rainlendar adds it and changes the color on the correct date, then after 2-3 seconds, it deletes it. This has worked in the past (last one was 01/04/2014).

Here is the log file contents:

```
10:07:13 AM: Category file: C:\Users\Andy\.rainlendar2\categories.ini
