
Any skins with year calendar?

Posted by Spider - 2014/01/16 04:18

So far I only found the standard skin - shadow4 - having a year calendar.
Is there anyone else in the collection.
Is there a search-filter-option for getting a skin with year calendar?

Thank You for Your answer!

I'm using Sidewall - skin at the moment and would prefer a skin like sidewall which has a year calendar...

Thank You, Lou! Your Version is fine! I used it in the past, and now again - with the new feature of year calendar!

Edit: Only the todo-List seems not to work... when I type in "test", nothing happens. Later it is visible when I'm using another skin... Also my other tasks in the todo-List are not visible.

Why? What can I do?

Those ToDo List that can not be used, is because that those had re-modified to match the new features on newer versions of Rainlendar (b134 or later) (expand/collapse subtasks), resulting not work on older versions. You can update Rainlendar, or still to use older skin's ToDo List that has not re-modify.

At the moment I'm using 2.11 build 129-1.
The latest build is buggy with login at google tasks. So I'll wait for next release...

thank You!

Thx :)

Otherwise OK for me, you test Rainlendar2 version 2.12.1
