
event (task) which takes more than one day

Posted by weepie - 2007/02/01 13:41

now, when I set event running 3 days, in the EVENT list it shows:

Monday

...event summary

Tuesday

...event summary

Wednesday

...event summary

And I think better it will be short like this (set in options - short or normal):

Monday - (3 days event)

...event summary

or

Today - (3)

...event summary

And after this date:

Today - (2 days event)

...event summary

The header cannot be changed since there might be multiple events on the same day. But I think I already have an entry in my todo list to do something about the events that span across multiple days.
