## Visible on the list n days before event date.

Posted by sinanilyas - 2014/01/18 04:38

---

There's this advanced option "Number of future days the list shows". Assuming that this option is set to 6, when I create a new event, it becomes visible 6 days before the event date. But I'd like to be able to set this value for each event. Thus, I might be able to see some certain events only on the event day and some certain events 1 or 2 days before the event date.
