Français

Répéter l'alarme

Bonjour,

À l'heure choisit, la fenêtre d'alarme s'ouvre, et la sonnerie retentie

Mais si l'on ne click sur aucun des boutons, elle s'arrête après le temps programmé

Il serait bon de faire sonner de nouveau l'alarme si l'on n'a pas choisi de bouton

Si par exemple l'on était absent lors de l'apparition de la fenêtre et la sonnerie, lorsque l'on revient l'on ne va pas forcément regarder l'écran du PC

On pourrait utiliser le "default snooze time" comme délais de répétition

Cordialement

Anglais

Repeat the alarm

Hello

At the time chooses, the alarm window opens, and counter-active ringer

But if you don't click on any of the buttons, it stops after the set time

It would be good to again sound an alarm if it chose not to button

If for example one was absent when the appearance of the window and ringing, when we come back we will not necessarily look at the screen of the PC

We could use the "default snooze time" as repeat times

Kind regards

You can define how long the alarm is played from Options->Advanced->"Loop the alarm sound".

Hello

Sorry for my English, but it comes with an automatic translation

I have perhaps not knew how to explain my desire

After the ring if you do not click on the button "SNOOZE" or the button "DISMIS", nothing happens.

What I want is that, even if you click on any of the buttons, the ringer restarts anyway

Kind regards

I'm sorry but I'm still not sure what you mean. Basically you have two options for the alarm sound. You can either have it play once or you can have it play multiple times. If you e.g. set the "Loop the alarm sound" to 3600 it will play for an hour unless you snooze or dismiss the alarm.
