
Recurrence problem while arranging task

Posted by victorgod - 2014/01/20 22:00

While recurrence for task that lasts for more than one day is set, the appearance of the task on the calendar changes. Here is the pic:

Is there something wrong with the software or my operation?

That's a bug. The recurrence is calculated from the task due date so it should not span to the next month. I'll fix that.
