
Add note to single instance of recurring event

Posted by niche99 - 2014/01/31 20:56

Hi,

I would like to be able to add a note to a single instance of a recurring event.
eg a weekly recurring event, at the moment if I add a note in the notes text box, every occurrence will show that note.

I would like to be able to add a note for one date/day of a recurring event and it would only show for that date and not for all dates in the recurring event.

Regards,
niche99

This is in my backlog. I'll see if it could be implemented in the next version.
