## Turn off Rainlendar Date/Event Summary?

Posted by stisev - 2014/02/07 20:20

---

I looked all over. I could not find a setting to turn off the rainlendar date, and events list popup that comes up with the events for the day.

It has a giant rectangular box with a white check in it.

Please, is there a setting to turn this off?

Do you mean the today window? Here's info how to disable it:

Wow, that was a specialized instruction set. I think that did it. And yes, I guess I was referring to the Today screen :)
