## Crash when Google Calender + Toodledo

Posted by Min - 2014/02/11 19:05

---

I'm using Rainlendar2 pro. It crashes when synchronizing and only happens when using Google Calender, Toodledo at the same time.

Here is detail.

=====  
OS : Windows7 64bit - Japan

Rainlendar2 Ver : 2.12 (2.11 crash too)

Crash step : When Rainlendar2 starts up

Dump link : [bit.ly/M9YZTu](http://bit.ly/M9YZTu) (

The crash seems to happen when Rainlendar is running some lua script during window redraw. Which skin you are using? If you disable all other windows except the calendar are you able to reproduce the crash after that?
