
Tasks show in Calendar ?

Posted by anoob - 2014/02/14 00:46

I have a question about: Tasks show in Calendar.

If I set a task, like:

Summary: test task

Due time: 15/02/2014 (D/M/Y)

Enable: Show in calendar

Recurrence: Repeat every 1 Weeks

You can see, in Tasks List, task show on 15/02, and in Calendar 15/02, 22/02, 01/03,... been marked. (img 1)

Then if I set task as completed, in Tasks List, task will show on 22/02, but in Calendar 15/02 has still been marked (img 2), and if I use Rainlendar_ListAllComponents("", "15-02-2014") to check, 15/02 has still include this task.

How do you thinks? Is it a bug?

Added: Another thing, if the date in Calendar had be marked, it context-menu only support "add New event", not support "add New task". Although It is not important, but a little inconvenient.

The task doesn't get deleted when it is marked as completed so that's why it also remains in the calendar. I could add an option to show only the non-completed tasks in the calendar. I'll think about it...
