
Recurrent not-started task with wrong current date

Posted by Jorge_Luis - 2014/02/14 14:15

I'm creating a task for a weekly TV show which would start on Feb 27th.
Creating a task with this values, shows Feb 27th as the original date and Feb 20th as the current and upcoming date.
The current and upcoming dates should be valid after the start time.

Testing further cases shows me that if I create a monthly task starting on Mar 15th, then the wrong date will be Feb 15th.
An exception is creating a monthly task starting on Mar 30th, which will be Feb 28th but for an obvious reason.

Ohh! Rainy, you seems leakage watched this question. I try to reproduce it.
Look at attached image, you can see: the time is different.

Yes, the manager can show the event's date before the actual start date. I'll fix that.
