
Double events

Posted by hnuijens - 2014/03/05 04:45

Recently I installed Outlook 2010 and use the outlook agenda.
Since that moment all events are listed twice, but I can't see where this originates.
The presentation is slightly different

Do you have multiple calendars configured to Rainlendar? If yes, try to disable them one by one and see if the duplicates disappear. If you only have the Outlook calendar configured then the events come from Outlook since Rainlendar does not keep copies of the events.

With the total reinstallation of my computer, I must have made a wrong action.
In the events list the items are listed twice (probably by a false copying action), so I have to correct the list and then the problem is gone. In the meantime however I use a different store for outlook and there is no double listing.
Thank you for your reply, Huub
