
Just a Clock 2

Posted by JamesSF69 - 2014/03/05 12:59

I do love the calendar, but I really wanted a ON TOP simple clock, and after searching internet-wide, I found there really isn't anything out there that I could customize and get what I wanted.
Now I've used a font that may or may not be widely used, so I'll change it to Ariel or something that every computer has if anyone's interested.
