
Outlook 2007- no profiles?

Posted by sancraer - 2014/03/07 02:34

I'm trying to use rainlender to read my outlook calender. I have the pro version. However it can't find a profile. Any help?

Do you get any errors when you try to create the Outlook calendar in Rainlendar? Are there any errors in debug log?

32 bit installation seems to have fixed it, sorry for using your time.
