## Drag tasks from one priority to another

Posted by rwilco - 2014/03/11 01:04

---

Hi!

First I want to say that I really love Rainlendar....

I would like the ability to drag "to do" items from one priority to another (my sorting order is "priority" and then "custom").

I thought that rainlendar had this ability before, although I'm not completely sure.

If it was in the last version, maybe I'll just install an older version.

Anyways, great program...thanks!

I think that it used to work that way in the past too but I'm not sure when it got broken. I'll see if it would be fixed.
