
Combining several ics files

Posted by isaacson - 2014/03/12 04:29

Is there an easy way to combine several ics files?

It's a really helpful part of this (excellent) software that it can use several calendars, but when I come to sync to my phone (using 'My Phone Explorer') it will only allow me to sync one calendar. What I would like to be able to do is combine all my calendars into one ics file.

There is not automatic way to do it but you can export all your events into one file in the Manager (File->Export->iCalendar Format).
