---

Is it possible to highlight tasks due today in the to do list? I'm using shadow skin.  
Thanks.

The Shadow4 skin does not have an appearance for tasks which are due today so you would have to edit the skin and make changes to the xml file. You can find instructions how the skin file can be decompressed from the Rainlendar's help. What you would need to do is to open the todolist.xml and add a new element to it (similar as ).
