
solid background

Posted by magus - 2014/03/16 08:41

Hi,
In an old post:

http://www.rainlendar.net/cms/index.php?option=com_kunena&Itemid=42&func=view&catid=3&id=14231&limit=6&limitstart=6

somedbody asked for the way to get a solid background, and the solution provided worked well for him. I have tested it and it works, but, what I want is the same, but for the year view calendar.

I dont know nothing about programming so any solution like the complete file like in that post will be very much appreciated.

As well, if possible, in a different colour than black, for example blue.

Tankyou and best regards.

I guess you are talk about "Year Calendar".

1)Add codes: below at , in "elements.xml"

2)Add codes: below at , in "year calendar.xml"

ps: Attached the modified files (include "elements.xml" & "year calendar.xml")
