
Length of event list

Posted by fbaillie - 2014/03/19 08:21

Is there a way to change (in my case lengthen) the Events list?

Mined uses about 1/3 of the screen depth and I'd like to show more events by lengthening the list.

You can change the height by selecting Windows->Settings->"Event List" from the context menu and changing the "Eventlist height" value.
