## Can't Connect New Version To Default.ics

Posted by bmrathbun - 2014/04/26 16:22

---

Recently my installed Rainlendar quit working so I downloaded a fresh copy and installed that. Now it won't open my saved data. I've checked the default file location address and that is correct, but every time I open Rainlendar it comes up all blank... no holidays and none of the info I've previously entered. I have verified that my personal schedule is in the file default.ics that Rainlendar is pointed to. What can I do?

=====

---

Try running Rainlendar in the debug mode and check from the debug log if it contains any errors. You can also send the log to me (use Rainlendar's support address) if you need help with understanding the log.

=====

## Re: Can't Connect New Version To Default.ics

Posted by bmrathbun - 2014/04/28 09:22

---

found

10:14:51 AM:

10:14:51 AM:

10:14:51 AM: Filename=C:\\Users\\Barbara\\Desktop\\Documents\\default.ics

That looks like the right address but the data still doesn't show in the calendar.

also found

10:14:51 AM: Error: can't open file 'C:\\Users\\Barbara\\.rainlendar2\\license.r2lic' (error 2: the system cannot find the file specified.)

That's all the errors I could find.

???

---

Do you also see a line like this in the log:

Default: Read 3 VEVENTs and 0 VTODOs from file "C:\\Projects\\Rainlendar2-x86\\testbench\\Debug\\Default.ics"

If you do you should at least see the events in the Manager window. If the Manager shows the events but the calendar does not you might have a filter defined for the window. Choose Windows->Settings->Calendar from the context menu and check that both the include and exclude filters are empty.

=====

## Re: Can't Connect New Version To Default.ics

Posted by bmrathbun - 2014/04/28 11:37

---

found

Default: Read 1273 VEVENTs and 1 VTODOs from file "C:\\Users\\Barbara\\Desktop\\Documents\\default.ics"  
but neither Manager nor Calendar shows any events.

???

=====

---

Can you send the full debug log to me (use the Rainlendar's support address)? I can try to check what's causing this.

### Re: Can't Connect New Version To Default.ics

Posted by Rainy - 2014/04/29 10:31

---

The events in the \*.ics file are missing the identifier (UID) so Rainlendar cannot read them. Any idea what has happened to the file which could have caused this? If you have old backups still available you can check if one of them contains a working file. You can also send the file to me (use Rainlendar's support address) and I can check if it still can be recovered.

---

### Re: Can't Connect New Version To Default.ics

Posted by yahaira - 2014/05/21 03:23

---

hello i have the sane problem

I have verified that my personal schedule is in the file default.ics that Rainlendar is pointed to. What can I do?

---

### Re: Can't Connect New Version To Default.ics

Posted by Rainy - 2014/05/26 01:41

---

You can import the file in manager (File->Import->iCalendar Format). Rainlendar will automatically create the UIDs if they are missing.
