## Event problem

Posted by Towert7 - 2007/02/05 13:49

---

Hello.

I am using Rainlendar  
Version 2.0.2 (b32)  
And I have a problem.

I want to make an event that occurs on Monday, Wednesday, and Friday of each week, repeated every week at a certain time.

I have made an even to do just that, except that it also repeats on Thursday (even though I don't have it checked). I think this is a bug.

<http://people.umass.edu/dvonmalu/pics/event.gif>

Hope this helps, and thanks.

It's a known bug. Will be fixed in the next version.
