
Photo widget

Posted by magab - 2014/07/05 05:15

Shadow4 Photo widget does not work with Flickr for a few days.... maybe some changes to Flickr access?

Flicker API seems to require SSL nowadays. I'll see if the widget can be fixed.

Here >>> <https://code.flickr.net/2014/04/30/flickr-api-going-ssl-only-on-june-27th-2014/>

:)

no longer use HTTP. changed your code to use HTTPS !!!

```
in photos.lua change >
url = "http://api.flickr.com/.../...
per
url = "https://api.flickr.com/.../...
```

enjoy
