
Re:how to import events data?

Posted by Maxybaby - 2007/02/12 20:19

I have followed this process but just get an 'Import Failed' message when trying to import a Rainlendar2.ini.

This is on a clean install of Vista - have other succeeded with Vista I wonder?

Any help most appreciated,

Max

Oops, am so sorry...I have trying to 'Import' rather than 'Restore'. Now I should be able to do it...
