## Rainlendar.dll not found

Posted by mountiealpha - 2007/02/12 20:58

---

Whenever I restart or refresh, I get the following error-

Title: Rainlendar2.exe - Unable to Locate Component

Message: This application has failed to start because Rainlendar.dll was not found. Re-installing the application may fix this problem.

This prompt comes up three times, then Rainlendar seems to load normally.

I'm running Windows XP SP2 and Rainlendar v2.0.2b32. I have 5 calendars, the DigiClock, my event list and todo list open. All of my iCal's seem to load fine.

Log file quote follows-

BEGIN LOG

```
19:49:27: Error: can't open file 'C:\Documents and Settings\\.rainlendar2\license.r2lic' (error 2: the system cannot find the file specified.)

---

I had to reformat my pc. When I installed this latest version I got the message could not find MSVCR71.dll so it would not open up.
