## 30 boxes subscription

Posted by laurence22 - 2007/03/02 15:20

---

I've decided on 30 boxes as my network calendar of choice and was able to get it connected to Rainlendar.

My events to show up from the "ICS file" link (the webcal:// links don't seem to work), but they don't update automatically. I have to manually refresh as I get an Network error (error:0) when I enable the Polling feature.

Is this a problem with the way 30 boxes does the ics subscriptions? I noticed that getting to the ics links were different than described in Rainlendar's help file.

They seem to have changed the site. I'll update the help file. I'll also check if there is anything that can be done about the update problem.
