
Month number

Posted by Jazbin - 2007/03/03 10:18

hi!

I'm using Shadow4 skin and I would like to know if there's any way to put current month number beside the current year (01.2007. or 04.2007.) in the lower right corner.

thank you!

Yes, but you would have to create a new image for the month which contains values from "01." to "12." and modify the skin to add it to the window.
