
Beta33 and Beta 34

Posted by Darth - 2007/03/05 10:37

Hi Rainy,

i've a little problem with beta34:

It seems, that in Beta33 the "EVENTS" from Outlook2000 will imported but NOT the "ToDo's"

in Beta 34 he imported the "ToDo's" from Outlook2000 but NOT the "Events"

i'm a little confused now and try it tomorrow again ;) (but maybe you can check that too)

I can confirm that the todos do not work in Outlook2k but the events did work also with the latest build. If you have trouble getting the Outlook's events to show, could you attach Rainlendar's debug log?
