## Changing TIME format to 12 hour

Posted by MyHeadHurts - 2007/03/08 05:18

---

Changing time format to 12 hour. Went through hell to achieve this, clear as mud.  
But here's what worked on a Windows system.

1st - The clock -

> Options > Skins > Available skins > Shadow4 > DigiClock > Right arrow to active skins. Now you have the clock.

2nd - Changing the time to 12 hour format -

> Options > Skins > Active Skins > Windows > Shadow4-DigiClock > Settings > Variables > Format > Then add this in the field on the right.

%#I:%M:%S %p for the full 12 hr time display

%#I:%M %p without seconds

%#I:%M:%S without Am-Pm

Hope this helps.
