## omit completed events?

Posted by rij73 - 2007/03/08 15:17

---

Hi, I'm using Rainlendar with Google Cal. Is there any way to have the day's events drop off the Event List as their time passes? That would be really cool. I would love to see the list always begin with the NEXT scheduled event...

It's possible to hide the dismissed items automatically but events that do not have alarm cannot be hidden.
