
source code

Posted by mjafari - 2007/03/11 10:17

Hi !

I develop as a job but i am newbie in open source programming.

I found that the license of Rainlendar is GPL2 but where can i get its source code?:blink:

and :blush:

what is the programming language of Rainlendar?

Rainlendar2 is not an open source application. You can get the GPL licensed old version from here:

<http://vapaa.dc.inet.fi/~rainy/legacy.html>
