Hi! I develop as a job but i am newbie in open source programming.
I found that the license of Rainlendar is GPL2 but where can i get its source code?:blink: and :blush: what is the programming language of Rainlendar?
Re:source code
Posted by Rainy - 2007/03/11 14:36  Rainlendar2 is not an open source application. You can get the GPL licensed old version from here:
Rainlendar2 is not an open source application. You can get the GPL licensed old version from here: http://vapaa.dc.inet.fi/~rainy/legacy.html
