
Localization on beta versions

Posted by Felipe - 2007/03/14 13:00

Is the .po from beta versions available for translation? If so, where?

I wanna translate some of the advanced options to spanish.

Thanks in advance for any help you can provide.

I asked the same question to Rainy some time ago. Here is his reaction:

I don't recommend spending time on translating the beta versions. It's very likely that the strings will change in the coming builds. There has also been changes to the existing strings so the new translations are not fully compatible with the currently released version so they shouldn't be uploaded to the website in any case. So, it's better to wait for the final release and update the translation after that.

So we just have to wait...
