
small bug in to-do

Posted by JMPc8m5v - 2006/11/02 01:00

i found a really small bug in the to-do manager but i figure you'd want to know of it anyway.

when i create new to-do's, and pick 'low' as the priority, then the priority shown in the manager is 'high'.
medium shows medium, but selecting a 'high' priority shows 'low' in the manager.

the reason it's just a small nuisance is because this doesn't affect how they show up in the to-do list window, only the to-do manager.

Confirmed, I experience the same odd behavior here; priorities "none" and "medium" are displayed correctly, whereas "high" and "low" are swapped in the Manger window.

The priorities should work in build 26.
