## Editing events makes times & alarms change

Posted by goldflesh - 2006/11/02 03:06

---

When editing an existing event, if I don't make changes to the start time (in this case 12:45), it changes to something else (09:00) when I save it.

If the alarm had been set to 0 minutes before the event starts, when I edit the event it changes to 0 days before.

Hmm, I can't reproduce this bug; just tried it with an appointment I have on Saturday at 1100h; I edited the summary, and it still has 1100h-1200h set as the time!?

It's a bug. The time is changed to the current time. Will be fixed.
