No connection to outlook application

Posted by ohhappyday - 2007/04/05 12:40

_____

If I add or delete a date, it does not happen in the outlook application, too. There is no synchronistation from rainlendar to outlook. In the other direction it works (from outlook to rainlendar).

_____

Rainlendar is currently only able to read events from Outlook. Writing is not possible.
