
Copy event.

Posted by McMelloW - 2007/04/05 15:43

Is there a way to copy existing events, change the date, time into a new event?

There probably isn't any easy way. Even import-export probably won't work since the identification string doesn't change. You would have to do that directly in the ics-file or just copy-paste the strings from the event dialog.
