
Skins - fonts and categories

Posted by Elkiaer - 2007/04/08 20:06

I started editing the categories shadow4, and I quickly found out how easy this was. However, I have one simple question about the fonts. Apparently there are 4 places you can edit the font for a category. For "Important" the 4 lines look like this:

```
<appearance target="16" layer="0" priority="100" element="font.bold" color="255,0,0,255" effect="BORDER" align="TOP-LEFT" /> //Detail bobble
<appearance target="2" layer="0" priority="100" element="font.bold" color="255,0,0,255" effect="BORDER" align="TOP-LEFT" padding="0,0,0,3" /> //Eventlist text
<appearance target="4" layer="0" priority="100" element="font.bold" color="255,0,0,255" effect="BORDER" align="TOP-LEFT" padding="10,0,0,3" /> //???
<appearance target="8" layer="0" priority="100" element="font.large" color="255,0,0,255" effect="BORDER" align="TOP-LEFT" padding="15,0,0,0" /> //Alarm
```

By playing around I figured out 3 of the lines (I made notes for these). My question is: what does line 3 (target="4") do?

Target 4 is the todo list.
