
Calendar Name

Posted by cfedge - 2007/04/10 09:41

Hello,

I cannot seem to find out where the Calendar name can be added to the calendar so I can see which one I am looking at. Does this feature exist?

Thanks!

Randy

PS: This is a repost from the discussion forum. I did not receive any replies over there , so I thought I might have better luck over here.

This forum usually is not so active that you would get answers within a day. So, there is no need to repost the topics.

Anyway, to answer to your question: No, such feature does not exist.
