
Manual?

Posted by Pyros9 - 2006/11/02 12:19

I'm sure it's just me, :blink: since no one else has asked... But where do I locate the manual everyone keeps referring to? I've looked everywhere I can think of. I have many questions, most of which can hopefully be answered by reading the manual. Thanks.....

Select "Help" from Rainlendar's context menu.

See? I knew it would be something simple. I always seem to overlook the most obvious answer.. :S

Thank you.....
