
ICQ plugin showing buddies in rainlendar style

Posted by bjorn - 2006/11/03 06:18

Hi folks,

what I'm really missing is an ICQ plugin showing all my online buddies in rainlendar style (Lucid) on my desktop. That would be so awesome cause I love this skin - unlike most of the currently available ICQ clients. If anyone is interested in becoming my best friend, please don't hesitate to start programming :-)

Best regards,
Bjorn

Wit Miranda IM (multiclient instant messenger) you can do that.
