## Capacity to share an agenda with google agenda

Posted by uncommon - 2006/11/03 10:00

---

Hello!

Thank you very much for Rainlendar!

I mean that in Google Agenda you can share an agenda with someone (an email is needed). It would be nice if Rainlendar could be set to receive and show this agenda. (even if a single mail is created just for that use...)

What do you think? :dry:

Oh God!

I found by myself that it is already possible!

Everyone just need to use "Private URL" in Google Agenda and stick it in Rainlendar.

I'm confused about last post... :blush: ...but it is really really useful! ;)
