
Lost mouse-over

Posted by iggy - 2006/11/04 01:55

I have lost the pop-up balloon that shows when placing the mouse over an event on the calendar.

Any ideas why?

Yes. Added a background, changed colours, etc.

Does the advanced skin options show the tooltip in the active side? Does the skin that you are using correctly define the tooltip? Are there any errors in the log file? If you switch back to the original skin does it work then?

That was it. I switched the tooltip back and forth and that fixed the problem. Thank you for the advice.
