## Rainlandar ini-Format

Posted by b3nni - 2006/11/06 09:47

---

can't import Rainlandar ini-Format! (it's not available in v. 2) maybe there is a chance to convert the old "ini" format to a new one like iCalendar or Outlook?

thanx for help & greetz

---

during the installation it should try and find your old ini file and convert it, maybe that was just the events and todo

Uhm, I imported my old INIs via the Manager, and that worked fine IIRC.

(However, I started from scratch later on; just didn't trust the import functions to do a 100% proper job - it's the OCD, I can't help it... :ohmy: )

thanx ;) i haven't seen it...

now all works fine for me.
