
Rainlendar 2.2 build 46

Posted by Rainy - 2007/09/09 07:11

Build 46 can be downloaded from here:

Windows: Rainlendar-2.2.b46.zip

Linux: Rainlendar-2.2.b46.tar.bz2

This is beta version! It has not been tested.

- 09 Sep 2007

- o Local time was interpreted as UTC in the Google plugin. Fixed.
 - o Added support for templates to event and todo dialogs. Check the manual for details how to use them.
 - o Dismissing an event hid also the next event from the list. Fixed.
 - o Added page setup to print dialog.
 - o Fixed links that were surrounded with parenthesis.
 - o Added an advanced option to show the name of the calendars in the event and todo lists.
 - o Support for Mozilla alarms is now optional.
 - o Creating a new event or task from the tray menu sets the date correctly now.
 - o Added option to use the default Google alarms. Works only if you don't define any alarm for the event.
 - o Events added to Google calendar are not deleted from other calendars anymore (you'll get duplicates though).
 - o Added an option to group the multiday events in the event list.
 - o Added support for "On Desktop" setting on Linux.
 - o Fixed a crash bug when multiple network calendars were used at the same time.
 - o Calendar lists can be now filtered from the window settings by using the "Visible calendars".

Is there a change in the skin?

I usually modify it to add custom categories style in previous versions

But in this version, every time I modify the skin and reload it

It said it cant be loaded

IMHO the best version till now, because it is stable using 5 online calendars :=

Jackal, the skin is the same as in the previous build. Check from the log file what goes wrong when the modified skin is tried to load.

After installing this I noticed that the first event of every day is listed last on the Events window.

i.e.

9:30am-10:20am Class 2

1:00pm-4:20pm Class 3

8:30am-9:20am Class 1

That happened with all my class schedules

or

t1-t2 Event 1
t3-t4 Event 2
All day event

when the all day events are the first on the list in previous builds.

Yes, I noticed that too. I'll fix it in the next build.

o Calendar lists can be now filtered from the window settings by using the "Visible calendars".

Thanks ! :cheer:

o Added support for templates to event and todo dialogs. Check the manual for details how to use them.

Very nice and useful feature. Makes Rainlendar even more powerful !

Maybe you can add an hint if an template already exists and will be overwritten -> Ok-Cancel Prompt
