
Sidewall: Veritcal Calendar Skin for Rainlendar 2

Posted by nick2588 - 2007/09/12 15:54

Sidewall is a vertical calendar skin for Rainlendar 2. It's still a work in progress, but please check it out and let me know what you think so far.

Use it and love it: clear and uncluttered, which is just what it should be. Thanks for making it!

No problems to date.

Would like to extend the number of lines visible in the To-Do list. Is this possible?

Sorry about these multiple posts: I've no idea what I've done to generate them...

Yes, you can make the list larger, and this will allow more items to be displayed.

Right click on the Rainlendar system tray icon and choose Options. Go to the Skins tab. Under the list of skins, click the Advanced button to show the extra skin settings. In the new list that appears, double click on "Sidewall - Todo List". A new window will appear with a list of variables. Scroll to the bottom of the list and you should see "Todo Height". The default value is 200, but you can increase this value to display more Todo list items.
