
Day overview like a time table?

Posted by Bonilla - 2006/11/06 14:55

Hello,

is there any way Rainlendar can show me all events of a day in a format similar to a time table at school? Or is there only the table showing the single days of each month?

Thank you very much

Bobby

Short answer no. Long answer, Rainy may implement it in the future as a feature request.
